

Responsive Layout

- This is how I made my texts and images responsive: As you can see in my codes on CSS, on every Class that is necessary to be Responsive, I applied 100% width and height on every measurement:

```
# styles.css > ...
1  body {
2      font-family: Arial, sans-serif;
3      margin: 0;
4      padding: 0;
5  }
6
7  /* Navigation Styles */
8  .navbar {
9      background-color: #333;
10     overflow: hidden;
11     padding: 30px 20px;
12     position: fixed;
13     width: 100%;
14 }
15
16 .nav-list {
17     list-style: none;
18     padding: 0;
19     margin: 0;
20 }
21
22 .nav-list li {
23     float: left;
24     margin-right: 20px;
25 }
26
27 .nav-list a {
28     text-decoration: none;
29     color: white;
30     font-weight: bold;
31     padding: 10px 20px;
32 }
```

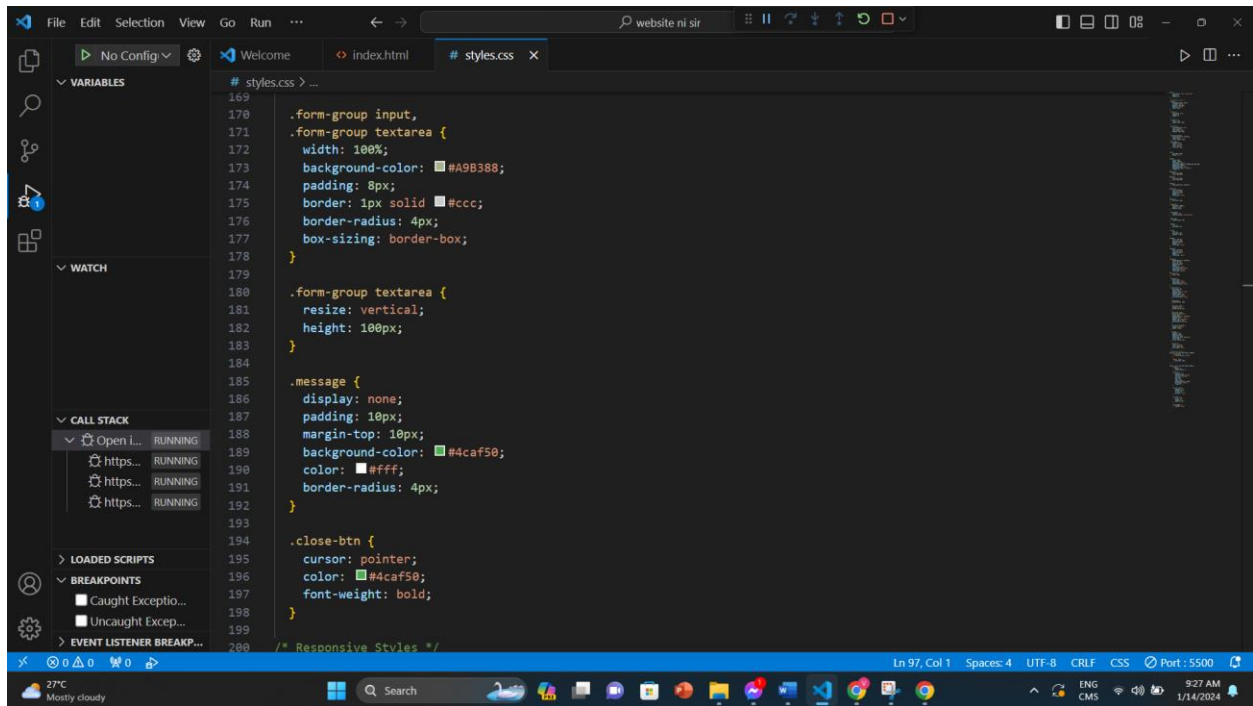

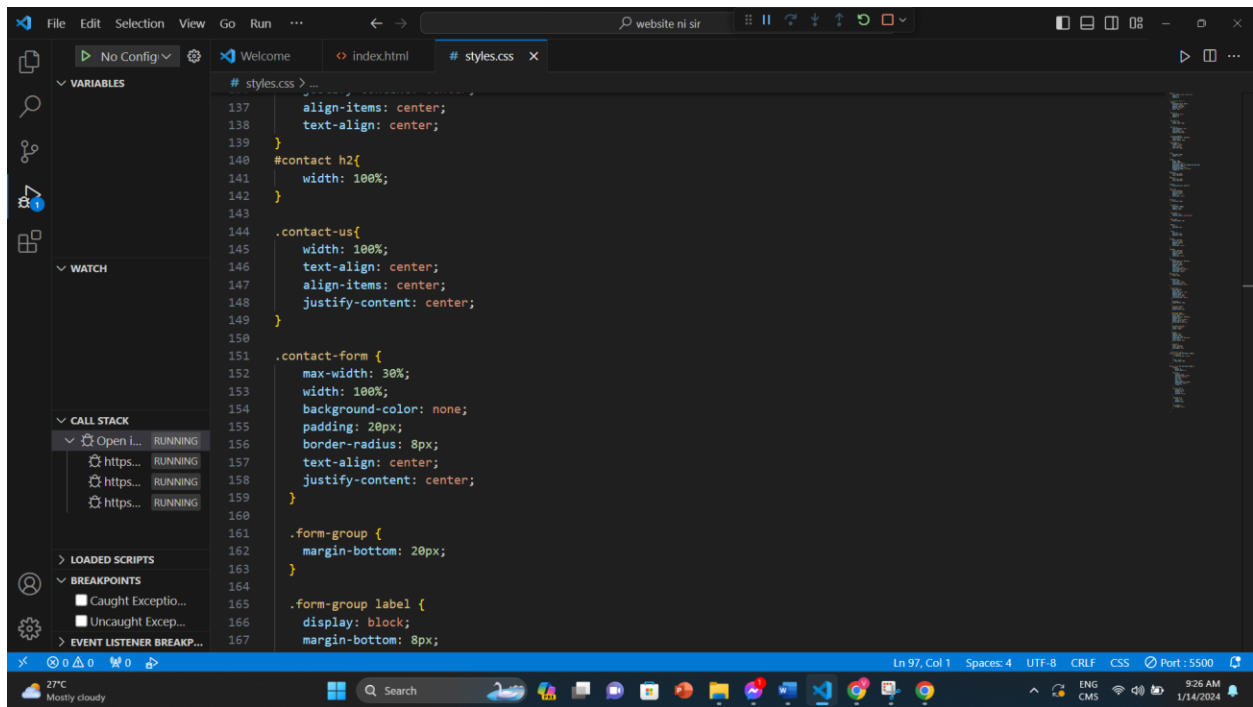

```
# styles.css > ...
33
34 .nav-list a: hover {

The Run and Debug view shows the call stack with the current execution point at line 81. The status bar at the bottom indicates the file is at line 6, column 1, with 4 spaces, UTF-8 encoding, CRLF line endings, and CSS language. The system tray shows a temperature of 27°C and the date 1/14/2024.
