Implementation of Favicon

- **Here is how I implement the Favicon to my project:**

```html
 7        <title>Adie - Filipino Singer</title>
 8        <link rel="icon" href="adie-logo-73-1592497299-removebg-preview.png" type="image/x-icon">
 9        <link rel="stylesheet" href="styles.css">
10    </head>
11    <body>
```

Result:

| ✕ | Adie - Filipino Singer | ✕ | Challenge3-Layout-and-Menu-I | ✕ | C3.pdf |
